SUITABLE FOR LIGHT INDUSTRY APPLICATIONS

STX-50

External sensor extension cable

LogTag Recorders

The LogTag® STX-50 is a 5 meter (~16’ 5”) extension cable for extending ST10 or ST100 external temperature sensors.

The socket end of the cable (which accepts the ST100 or ST10 sensor plug) is fitted with a flexible sleeve that when the ST sensor’s plug is in place will protect the mated connection to IP61.

Features

FDA Food Rated and Gold Plated Connector.

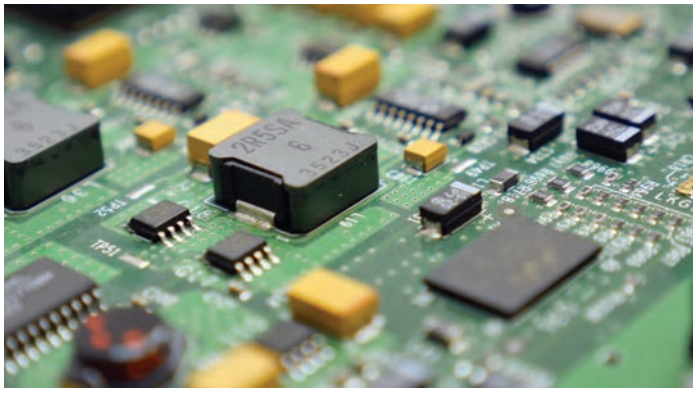
5m

Available in 5.0 Meter Cable Length (only 1 extension per logger).

Extension is designed as a permanent connection and not for frequent connections.

Cable Terminated to MCX Plug.

Applications



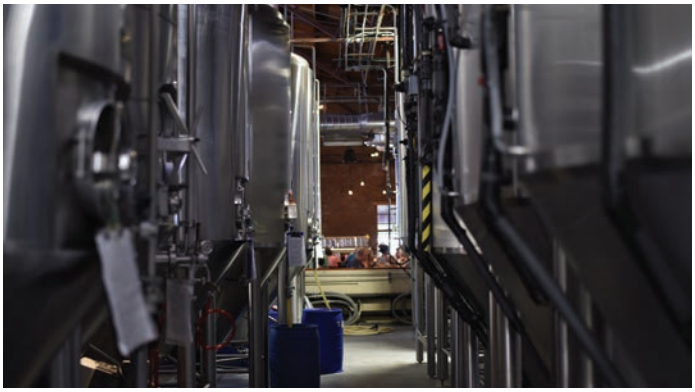
Electronics

Food & Produce

Warehouse

Freight

Textiles & Wood



Manufacturing

Specifications

Product Model	STX-50
Length	5 meters (16’ 5” approx)
Environmental	Logger to extension connection rating: IP61 (when logger vertically mounted or hung) Extension to probe connection rating: IP61, -46°C ~ +74 °C
Compatibility	LogTag® ST100 and ST10 external temperature sensors

EMI might typically add an additional +/- 0.2°C measurement inaccuracy to the logger readings.
