The DL1000-1400 temperature data loggers include the VL series for regulated environments and the SP series for non FDA/GxP regulated industries.

Suitable for validated and standard precision monitoring

Validatable data loggers, together with Vaisala software solutions, provide a superior, high accuracy solution for use in FDA/GxP regulated environments by ensuring tamperproof files and electronic records that meet 21 CFR Part 11 requirements.

The DL1000-1400 temperature data loggers include calibrations traceable to SI units through national metrology institutes. [1)]

DL data loggers are compatible with the browser-based Vaisala viewLinc continuous monitoring software. viewLinc provides 24/7 multi-stage alarm notification and remote monitoring, and is suitable for regulated environments.

Additional software options include vLog VL for regulated environments and vLog SP for standard precision monitoring. vLog software solutions allow downloading, displaying, analyzing, and reporting of recorded environmental data.

Applications

The DL1000-1400 temperature data loggers are ideal for monitoring and validation of:

- Refrigerators and freezers (to −90 °C (−130 °F))
- Incubators
- Stability chambers
- Warehouses
- Ambient conditions

Autonomous power and recording capacity

Each data logger contains a battery [2)] and onboard memory for recording at the point of measurement. With autonomous power and recording capacity, data is immune to network and power interruptions.

1) *Measurement results are traceable to the international system of units (SI) through national metrology institutes (NIST USA, MIKES Finland, or equivalent) or ISO/IEC 17025 accredited calibration laboratories.*
2) *Expected battery lifetime up to 10 years in typical use.*
