TRT-1R - Touchscreen room thermostats

TRT-1R smart thermostats offer a modern flush mounted slim design look for heating or cooling control. The thermostats can be used for various zone control or underfloor heating/cooling control applications and they have 3.5” backlit colour touchscreen. The devices are connected to BMS or controllers via Modbus or BACnet communication interfaces. The thermostats can also be configured to be used as a lighting and/or air conditioning interface.

The thermostats are equipped with a relay output (230 V, 7 A), two external sensor inputs and a digital input.

The products are available with two different supply voltage choices.

Wiring

Warning: Device wiring and commissioning can only be carried out by qualified professionals. Always make the device wirings in de-energised electricity network.

Warning: This product is appliance class III product according to IEC 60664-1. The product may only be connected to SELV (safety extra low voltage) electricity network.

CAUTION: The product may only be connected to overvoltage category I or II electricity network according to IEC 60664-1.

CAUTION: The used cables must have minimum of 230 Vac insulation for SELV wiring, if the mounting box includes also 230 Vac voltage wirings.

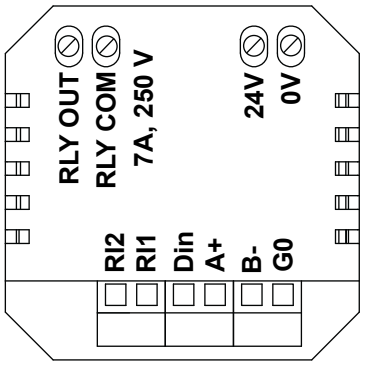

CAUTION: Use single stranded wires or use wire end sleeves if multi stranded wires are used.

CAUTION: Don't connect fan motors in parallel. One product can control only one fan motor.

CAUTION: The relay connection wiring cross sections must be adapted to the overload protection conditions (max. 10 A). The wirings must always comply with local regulations.
