Plastic Cryo Boxes

NEW PRODUCT

Plastic Cryo Boxes with 9x9 grid
130 x 130 mm

9x9 grid – fit for most storage applications

Durability - high-quality polypropylene (PP)

Temperature resistant - withstand -90° to +121°C for reliable cryo vial storage and easy autoclaving

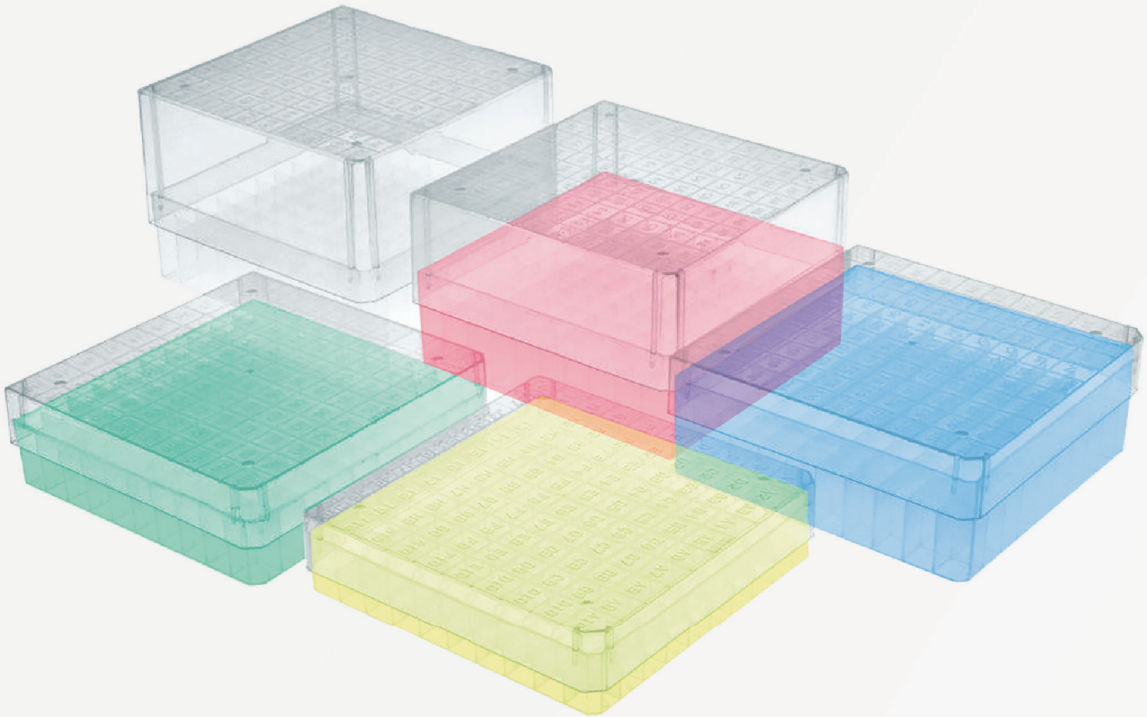

Easy sample organisation - moulded alpha-numeric coding on box lid and bottom enable sample location with the box opened or closed

Bottom vent holes – rapidly increases freezing time and allow liquid drainage

Transparent lids - make it easy to see contents

Height options – 50 mm, 80 mm and 90 mm

Easy sample sorting – with coloured bottoms in blue, green, red, yellow as well as in clear

Cardboard Cryo Boxes

Durability - high quality cardboard boxes feature a very hard-wearing, water-repellent coating which protects them from moisture damage and makes them extra resistant to alcohols and mild organic solvents

Temperature resistant - withstand temperatures as low as -80°C without any loss of integrity

Eco-friendly - fully recyclable, environmentally-friendly materials with low carbon footprint

Available to two footprints - 133x133 mm is particularly suited to space-constrained laboratories / 136x136 mm perfect for large sample storage demands

Height options - 32 mm, 50 mm, 75 mm, 100 mm and 130 mm suitable for different tube heights

Easy sample sorting - multiple colours boxes available: white, blue, green, red and yellow

Labeling option - Write-on surface

Optional cardboard dividers - can be used to store a wide range of laboratory items
