Petri Dishes

Superior quality, contaminant-free petri dishes - manufactured in a cleanroom facility, resulting in sterile dishes

Certified purity - free of endotoxin and pyrogen

Space-saving - with a standard sized diameter of 90 mm, AHN Petri Dishes have the perfect balance between plating area and space-saving dimensions. These dishes benefit from being both lightweight and fully stackable - raised rim allows easy stacking by hand without slipping or scratching

Excellent airflow - supplied in vented and non-vented formats to accommodate different microbial culture needs. Vented plates have a lip that allows for airflow and moisture control whilst non-vented dishes limit airflow and maximise moisture retention.

High-quality material - made of high-quality polystyrene that meets the specifications of US FDA regulation 21 CFR 177.1640

Product traceability - each batch is supplied with a traceable lot number as well as information on sterility and expiration

Compatibility - fully compatible with medium-throughput carousel-based media preparation systems / Compatibilty Chart is available on request

Packaging Options - available in 24x20 packs with grid and 25x20 packs

Ordering information

Product	Diameter	Height	Vented	Sterile	Colour	Pack Type	Sales Unit	Cat. No.
myPlate® Petri Dish	**91.5 mm**	**14.35 mm**	no	■	clear	bag	case / 24x20	3-520-48-0
