Foldable Reagent Reservoirs

30 mL/40 mL

V-shaped bottom - prevents bubble formation and ensures retrieval of the last drop of liquid for efficient reagent use

Sturdy construction - offers a consistently firm and stable reservoir for pipetting

Pre-folded design - allows easy assembly by simply pushing the sides together

Materials - Made from durable polypropylene, ensuring reliability and reusability

Cost-saving - Shipped and stored as flat sheets, saving space and reducing shipping costs

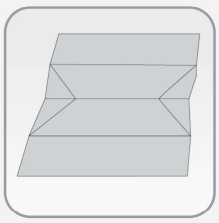

Available Volumes - as 30 mL reservoirs for 8/16 channel pipettes and 40 mL reservoirs for 12 channel pipettes

Eco-friendly - and space-saving, optimising storage and reducing environmental impact

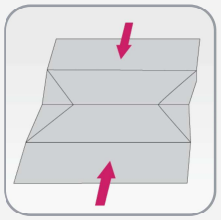

Space- Saving Increases - Increases workspace efficiency by saving benchtop space and lowering costs

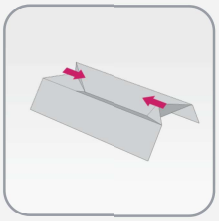

Ready in three easy steps...

Remove a flat reservoir from pack

Push two outer sides inwards towards the centre

Push end triangles towards centre to complete reservoir assembly
