SEROLOGICAL PIPETTES

CAPPHarmony Serological Pipettes ensure accurate liquid handling with precise graduations, colour-coded heads, and filter plugs for contamination-free work. Made from USP CLASS VI polystyrene, they are durable, versatile, and compatible with various pipettors. Perfect for reliable results in any lab setup.

Features

- Designed for accurate and rapid fluid dispensing, these polystyrene pipettes are sterile, DNase/RNase free, non-pyrogenic and filtered (polyolefin (PO) filter) for a variety of liquid handling applications
- Clear and precise graduation achieves an accuracy of ±2% of the total volume
- Dual graduations simplifies the identification of pipetting volumes, the negative gradations increase the pipette's capacity and accommodate larger volume needs
- The pipettes are supplied individually wrapped in an easy-to-open, fibre-free, colour-coded paper/plastic combination
- Each pipette comes with an effective filter barrier that prevents the sample, aerosols and water vapour from entering the pipette and protects the sample from contamination by impurities within the pipette
- The uniform mouth piece fits all major pipettors and is colour-coded for easy identification
